Career Objective

A self-motivated and quick learner with a strong analytical mindset and a passion for technology. Aspiring to contribute to innovative projects while continuously advancing my technical expertise and professional growth. To contribute in foundation in Java development and problem-solving skills to design efficient, scalable, and user-centric applications.

EDUCATION

BE(I.T.) - Parvatibai Genba Moze College Of Engineering Wagholi, Pune

Pune, Maharashtra, India 2021-2025

Location: Pune

7.20 CGPA
H.S.C - C.S.R College Jategaon(BK), Pune, Maharashtra

Pune, Maharashtra, India

86.83%

2020-2021

S.S.C - Rayat High School, Loni 74.60%

Pune, Maharashtra, India

2018-2019

SKILLS

Technical skills:

Languages : Core Java(Fundamentals, OOPs, Collection), C

Database : Oracle(SQL/PLSQL)
Frontend Technologies : HTML, CSS, JavaScript
Web Technologies : J2EE, JDBC, Servlet, JSP

Frameworks : Spring core

Development Tools/IDEs : Eclipse, VSCode

Tools : JUnit, Maven, Mockito, Git & GitHub

Behavioral Skills : Multitasking Abilities, problem-solving, Passionate about Learning

PROJECTS

SecureBank - Online Banking System

JDBC,Servlet,JSP,Java

Source Code

- Developed a secure banking system with CRUD operations, optimizing transaction processing and account management. Implemented JDBC, Servlets, and JSP for seamless backend operations, ensuring data integrity and security.
- Designed a responsive and user-friendly interface using HTML and CSS, enhancing user experience.
 Key features include account creation, deposits, withdrawals, fund transfers, and account closure, providing a comprehensive digital banking solution.

Currency Convertor

HTML5, CSS3, JavaScript

Source Code

- Created a Currency Converter Web Application using HTML, CSS, and JavaScript, integrating ExchangeRate-API for real-time currency conversion. Implemented asynchronous API requests to fetch the latest exchange rates.
- Designed a **responsive and user-friendly interface**, ensuring cross-device compatibility. Enhanced user experience with dynamic UI updates, efficient error handling, and seamless currency selection.

<u>Car Rental System</u> Java, OOP Source Code

- Build a comprehensive car rental system utilizing Java and Object-Oriented Programming (OOP)
 principles. Key accomplishments include Object-Oriented Design, Modular Architecture, Scalability and
 Maintainability, Efficient management
- This project underscores strong expertise in Java programming and advanced OOP methodologies, demonstrating the ability to develop scalable, efficient, and maintainable software solutions.
